

## **Model of Climate Zone**

You and your partner need to create a 3-D example of your climate zone. You will use a variety of materials during two class periods to create your model. Label your climate along with any weather that you depict. Tell us where your climate is located by giving us 3 examples of places in the world. Show us what it is like with materials. You may bring in items from home and/or use some things I provide.

### **Grading:**

Accuracy of model based on characteristics of climate: 7 points

Weather and 2 types of native plants labeled: 3 points

Tells us where your climate is located by giving us 3 specific examples (name the countries/states/etc.): 3 points

Model is 3-D: 1 point

Model is neat: 1 point

**15 points total**

**Due date:** Tuesday, Nov. 22<sup>nd</sup>
